WELCOME TO

Sanatan Forging Concept

Shape of the Future,
Forged one at a Time!

For industries that use metallic components like Agriculture, Pipe Fittings, Flanges, Railways, Refinery, Automobiles etc, forging is a crucial activity. Forging not only improves the strength of the metallic component, it also improves its performance over its life - cycle and provides better returns over normal components.

About Us

- Based out of Rajkot, Sanatan Forging Concept is the fastest growing forging company with an unmatched performance in Close - Die forging .
- Started by JEET KHANPARA in 2020 in hammer plant equipped with the latest equipment, and manned with skilled technicians, Sanatan Forging Concept soon emerged as a formidable player in Close Die category with clients in industries like Agriculture, Pipe Fittings, Flanges Railway, Refinery, Automobiles etc.
- We are a family owned entity and take pride in our Processes and more importantly in our employees.
- We are a process driven company. We are known to handle complex jobs easily, thanks to our process based approach.
- Besides supporting our customer requirements, we also believe in providing excellent career growth opportunities to our employees too. After all, our employees are our biggest asset.

Our Vision

To set standards for the Forging industry through innovation, process driven approach and use of right technologies in a sustainable way.

Our Mission

To achieve 300 MT output with best-in-class quality and become the preferred partner of various industries by 2025.

Who We Are

Get greater strength, better performance and higher returns with the leaders in Close Die Forging

Sectors We Serve

Borewell

**Pipe Fittings
& Flanges**

**Power Generation
& Transmission**

**Railway
Industry**

**Agriculture
Rotavator**

Oil Refinery

Our quality of service assessment involves controlling and managing resources by setting priorities for specific types of clients and projects on the system.

Our Values

Believe in honesty. Work with excellence.

➤ **Always care for our employees.**

At Sanatan Forging Concept these three values have always guided us in everything we do. The way we interact with our customers and vendors or with our employees and suppliers, is all inspired from these values.

➤ **Honesty**

We are always honest with all our stake-holders. We will always continue to remain honest with them in future too.

Everything we do, is aimed for excellence. Every process we undertake is a step towards achieving excellence in all our operations and interactions.

➤ **Care for Employees**

At par with our customers, our employees are our biggest asset. We are committed to provide them with workplaces that are fulfilling and safe.

Facilities

Close Die forging [2 kg. to 5 kg]

Here, a heated raw material is placed inside a die that has two moving parts.

By application of the desired pressure, the raw material gets the desired shape of the die. Generally, the lower part of the die is fixed, while the upper part is operated through a powered ram that applies a pre-set pressure.

The Close Die Forging method is suitable for most metals and their alloys. While it is very easy to set-up the Close –Die assembly, the trick is to operate it a manner that gives it a consistent quality output. Sanatan Forging Concept the latest equipment and has highly trained technicians that help us to achieve consistent quality output over prolonged periods of time.

Forging Machinery

1 Ton Belt Drop Hammer (Closed Die) Job Capacity up To 5 Kgs.

Choose us?

SEVEN STRONG REASONS TO CHOOSE US

➤ **Completely integrated**

We have extensive tie-ups with raw material suppliers as well as Logistics partners that ensures seamless services

➤ **Wide range of customer industries**

Our customers come from a wide range of industries ranging from Agriculture, Pipe Fittings, Flanges, Railway, Refinery, Automobiles making us a comprehensive player.

➤ **Solid Experience**

We have a rock solid experience of the forging industry. Having catered successfully to various crucial industries we are a trusted name today in forging.

➤ **Innovation in our DNA**

We rely upon innovation as one of the key inputs. This helps us achieve improved and consistent quality and fasterturn - around even for large volume jobs making us one of the most respectable players in the forging industry today.

➤ **Skilled Technicians**

Our state-of-the-art plant is operated by some of the most skilled and experienced technicians that makes us possible to undertake jobs that others think twice to

➤ **Right Priced**

With the help of correct inputs like latest equipment, faster and assured turnarounds, consistently high quality and plants operated by skilled technicians helps us to achieve lower input costs, which makes us one of the most affordable forging company in the industry today.
